Updating Employee Supervisor in T & E

Procedure

An Agency Travel & Expenses Maintainer sometimes will need to update certain elements of an employee's profile. The employee's supervisor is one such element.

Step	Action
1.	The TE Maintainer will update an employee's supervisor if either:
	 The supervisor noted in SMART is not the person who approves Travel & Expenses transactions for the employee at the supervisor level, or
	 SMART has no information in the supervisor fields for the employee. (In the instance no supervisor shows in SHaRP, none will show in SMART, either.)

Step	Action
10.	You will update the employee's supervisor in the " Supervisor Information " box. Most often, this box will be prepopulated by information from SHARP. Changes occurring in SHARP often cause this information to also change in SMART. Manually entering the supervisor's Employee ID number here, though, will leave the information here until it is changed again from this page, even if the employee's supervisor changes in SHARP. Click in the Supervisor Information ID field.
11.	Type the State of Kansas Employee ID Number for the person responsible for the supervisor level approval of travel and expense transactions. IMPORTANT: When selecting a supervisor in SMART you must ensure that the supervisor listed is not a proxy who will enter and submit the expense report. If a person enters and submits an expense report AND they are listed as the supervisor-approver, the transaction will error out. If this happens, the agency's Security Liaison must open a Service Desk request for assistance. Enter the desired information into the ID field. For this simulation, enter "K0000220283".
12.	IMPORTANT: The employee's supervisor information is maintained in SMART's Travel and Expenses module, but is not reported to SHARP . This process changes the supervisor only for purposes of workflow, where the employee's travel and expenses are concerned.

Step	Action
13.	To retain the supervisor ID you just typed, you must save this information to SMART.
	Click the Save button.
	Save
14.	IMPORTANT: As a rule of thumb, a supervisor entered into SMART following this process will stay in SMART until updated again.
	However, it is highly recommended to check the employee's profile to make certain the supervisor setting is correct before creating an expense report.
15.	CONGRATULATIONS!
	You have now completed the process for updating a T & E supervisor in SMART. End of Procedure.
